

LIPOCUBE

Secret to Timeless Beauty
STEM CELLS

Why Do We Age?

01

Loss of Bone
Volume

02

Tissue
Displacement

03

Reduced
Hydration

04

Gravity

05

Hormonal
Changes

06

Loss of Collagen
and Elastin

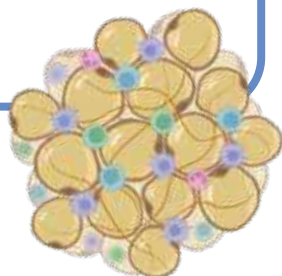

REVERSE Aging

Two primary approaches:

- Volume replacement through injectables and fillers.
- Volume restoration through fat injection, utilizing body's own resources, revealing a revitalized and naturally enhanced complexion.

What is Fat Injection?

Fat injection is valued for its ability to use the patient's own tissue, reducing the risk of allergic reactions or rejection. This procedure is often chosen for its natural-looking results and the potential for long-term benefits.

Stem Cell Enriched Fat Injection with Lipocube

Unlock the power of stem cells, found in fat tissue, paving the way for groundbreaking advancements in regenerative medicine.

Enabling volume restoration providing natural-looking and long-lasting results.

Possessing regenerative potential crucial for repairing and replacing aging tissues.

Enhancing skin quality, reducing fine lines, wrinkles and age spots for a radiant complexion.

Contributing to cellular repair, replacing damaged cells with healthy ones.

Stimulating collagen production improving skin texture and firmness.

EMBRACE THE NATURAL: STEM CELLS vs FILLERS

Your Cells are Safe

Hyaluronic Acid fillers have a risk of tyndall effect and lumps especially around the eyes

Your Cells are Natural

Hyaluronic Acid fillers are artificial

Your Cells Have Regenerative Effect

Hyaluronic Acid fillers have no regenerative effect

It is Long Lasting

Hyaluronic Acid fillers need to be renewed once or twice a year

There is No Risk of Allergy

Hyaluronic Acid fillers have a risk of allergy and adverse effect

Your Cells Will Give Natural Results

APPLICATION AREAS

For a naturally sculpted, youthful appearance, super enriched fat transfer with stem cells can be used to **restore volume loss and treat variety of superficial indications of aging and skin damage.**

ADVANTAGES

Regenerates
your cells

Ease of procedure which
can be performed under
local anesthesia
within almost 22 min.*

Fast recovery
within 2-6 weeks*

Single session,
lifelong impact

No risk of side effect

Cost-efficient

***Disclaimer:** Please be advised that the recovery process and procedural protocols may vary based on individual patient characteristics, health conditions, and specific medical needs. The information provided is general in nature and should not be construed as a one-size-fits-all guideline. Consultation with a qualified healthcare professional is essential to tailor the recovery plan and procedural approach according to the unique requirements of each patient.
